Demo #1 · Progressive Extraction

Sher Service Station

IndianOil

⚠ High Risk (81)

👤 Owner	—
# Dealer Code	DL-0102
# Lock Code	1539
# GSTIN	07AAJPK1526E1Z1
🕒 Hours	06:00 AM – 11:00 PM
📍 Address	Pankha Road, Near Janak Cinema, Janakpuri, New Delhi - 110058
📄 Type	Proprietorship
🕒 Est.	2000s

👤 KEY PERSONNEL

Sh. Bhim Singh • Sales Manager

via Fire Safety inspection report (2019)

🕒 OWNERSHIP LEGACY

The 'Sher' in the station's name is a patronymic reference to Aslam Sher Khan, former Indian hockey captain, World Cup winner, former Union Minister and Member of Parliament. The station was explicitly identified in news reports as being owned by Khan in the early 2000s. Such origins imply a high level of political connectivity and historically a higher risk profile. The current operating entity is structured as a Proprietorship, registered under GST in 2017.

Strategic Score

Core Network Asset - High Maintenance

🔧 Methodology

Locational Advantage: 25%

Product Portfolio: 20%

Operational Stability: 15%

Traffic Feasibility: 15%

Consumer Sentiment: 15%

Competitive Resilience: 10%

SCORE BREAKDOWN

Locational Advantage

?

Pankha Road is a goldmine for volume. The station is unavoidable. Deductions are only for the lack of a corner plot or multiple entry points.

LITIGATION PROFILE

Low

Shiv Sena activists → **Cheating customers in quality and quantity** Resolved (implied by subsequent operations)

"In 2002/2003, the station was ransacked by over two dozen activists from the Shiv Sena. The activists alleged that the station was 'cheating customers in quality and quantity.'"

RISK FACTORS

Chronic congestion on Pankha Road

Stalled Janakpuri Flyover project causing uncertainty

High vehicular density

Potential for political volatility due to historical ownership

Competition from newer, innovative stations (e.g., EV charging)

Product Portfolio

19/20

Stocking XP100 is a game-changer. It puts the station in the top 1% of outlets. The presence of CNG and Diesel Delivery rounds out a near-perfect mix.

Operational Stability

14/15

Active GST since 2017, consistent Fire Safety renewals, and a legacy survival since the 2000s prove immense stability.

Traffic Feasibility

8/15

This is the station's Achilles heel. The severe congestion on Pankha Road actively deters customers during peak hours. The "Stalled Flyover" risk creates long-term uncertainty.

Consumer Sentiment

11/15

A 3.8 rating is acceptable but mediocre compared to the 4.1+ of competitors. The CNG queue management is a persistent irritant.

Competitive Resilience

7/10

While it has a strong brand (IOCL) and legacy, newer stations like Speedways are innovating faster (EVs).

RECOMMENDATIONS

- › Monitor CNG Peak Hours.
- › Optimize CNG throughput (e.g., by dedicating specific lanes or staff to queue management) to unlock significant latent value.
- › Market XP100 availability more aggressively to attract high-value customers from Janakpuri who may currently go to competitors.
- › The dashboard should recommend monitoring CNG Peak Hours.
- › If the station can optimize CNG throughput (perhaps by dedicating specific lanes or staff to queue management), it can unlock significant latent value.
- › Additionally, marketing the XP100 availability more aggressively could attract high-value

customers from Janakpuri who currently drift to C M Enterprises at the Hyatt.

Fuel & Operations

FUEL TYPES

XP100

Ultra-premium fuel designed for high-performance luxury cars and superbikes. Its availability at Sher Service Station is a strong indicator of the 'wealth effect' in its immediate catchment (Janakpuri). Only a fraction of IOCL outlets in Delhi are authorized to sell XP100, marking this station as a 'Flagship' or 'A-Class' outlet.

XP95

With the implementation of BS-VI emission norms and the increasing number of turbocharged engines in mid-range cars, XP95 has become a standard requirement. Stocking this ensures customer retention among modern car owners.

XtraGreen Diesel

This additive-enhanced diesel appeals to the environmentally conscious fleet operators and new-generation diesel luxury vehicles, offering better combustion and lower noise.

Compressed Natural Gas (CNG)

This is the volume driver. Given the mandatory conversion of public transport to CNG in Delhi, this facility ensures a relentless stream of auto-rickshaws and taxis. However, this high volume is also the primary source of congestion on the forecourt.

Financial Profile

ESTIMATED THROUGHPUT

Petrol	High Volume
Diesel	High Volume
CNG	High Volume / High Queue

\$ REVENUE EST.

High Volume

📉 OPEX EST.

Not explicitly mentioned, but implied to be substantial due to high volume and operational complexity.

📈 NET INCOME

Not explicitly mentioned, but implied to be substantial given the 'High Volume' throughput, though potentially

💰 VALUATION

Not explicitly mentioned.

Location Intel

Severe Traffic

📍 Mixed

Affluent Residential (Janakpuri C, D)

High-density, unplanned/semi-planned (Sagarpur, Uttam Nagar)

Transit Traffic (Auto-rickshaws, Taxis)

↕ Access Analysis

Double-Edged Sword scenario: Absolute visibility due to slow-moving traffic, but difficult conversion as commuters fear losing their place in traffic to enter the station. Severe congestion on Pankha Road limits throughput. Maintenance work on Sagarpur flyover and Janak Setu (e.g., repair of expansion joints) frequently reduces traffic to a single lane, causing long backups.

🕒 PEAK DEMAND HOURS

08:30 AM - 11:00 AM

05:30 PM - 09:30 PM

📅 SEASONAL DEMAND DRIVERS

High-performance luxury vehicles

XP100 demand

All Year

Unconfirmed/Passive. While search tags associated with the station mention 'Level 2 AC Electric Vehicle Charging Stations', there is no definitive confirmation of an active, high-speed DC charger on site.

SAFETY & COMPLIANCE

- ✓ **Fire Safety Certificate (FSC)** — Issued vide letter No. F6/DFS/MS/2016/WZ/1292 on September 18, 2016, and renewed on May 3, 2019. Sh. Bhim Singh was the Sales Manager representing the station during the 2019 audit.

- 📍 High congestion on Pankha Road, serving as a primary traffic drainage channel for West Delhi. The station is located at Lock No 1539, Pankha Road, Near Janak Cinema, Janakpuri, New Delhi - 110058. Congestion due to stalled Janakpuri Flyover project and proximity to Sagarpur bottleneck/Janak Setu maintenance work. Peak Hours: 08:30 AM – 11:00 AM and 05:30 PM – 09:30 PM identified as 'Red Zones' for friction.

Staff: The station is mandated to maintain trained staff available round-the-clock, as implied by the requirement for functioning fire

impacted by
operational
'Friction' and
competition.

💰 **GST Turnover: Not explicitly mentioned.**

OPEX BREAKDOWN

Staff Implied to be significant due to the need for trained staff and a Sales Manager.

Electricity Not explicitly mentioned.

Not explicitly mentioned, but Maintenance implied due to infrastructure and safety requirements.

Inventory Holding Cost Implied to be significant due to the diverse product mix including premium fuels like XP100.

DEALER MARGINS

CNG: **Lowest margin**

Petrol (XP100, XP95, Regular): **Implied higher margin than CNG, especially for XP100.**

Diesel (XtraGreen): **Not explicitly mentioned.**

KEY INSIGHTS

- CNG is the highest-volume, lowest-margin product.
- The 'Double-Edged Sword' scenario on Pankha Road means high visibility but difficult conversion

Density of high-performance luxury vehicles in Janakpuri (Blocks C, D) justifies inventory costs for XP100 (100 Octane petrol).

Modern car owners

XP95 demand

All Year

Increasing number of turbocharged engines in mid-range cars require XP95 (95 Octane petrol).

Commercial vehicles and new-generation diesel luxury vehicles

XtraGreen Diesel demand

All Year

Demand for additive-enhanced diesel offering better combustion and lower noise.

Public transport (Mandatory CNG conversion)

CNG volume driver

All Year

High throughput of auto-rickshaws and taxis due to Delhi's mandatory CNG policy.

Stationary equipment (Generators)

Diesel delivery

All Year

Fuel at Call program for door-to-door delivery of diesel for backup generators in hospitals, malls, and apartment complexes.

School Runs

Volume Spike

All Year

School Runs 7:30-9:00 AM

suppression systems and unobstructed escape routes.

due to congestion.

- The failure of the Janakpuri Flyover project has paradoxically preserved the station's prime frontage and direct access, potentially benefiting its current operational model.
- Severe congestion on Pankha Road actively deters customers during peak hours.
- Forecourt cannibalization occurs when long CNG queues spill onto the main road, blocking petrol/diesel customers.
- Marketing XP100 aggressively could attract high-value customers.

⚠️ INFRASTRUCTURE RISKS

Stalled Janakpuri Flyover Project

Project located on the 700-meter stretch between DESU Colony and Janakpuri D-Block. Mired in bureaucratic paralysis for over a decade, stuck at the consultancy stage due to technical feasibility and lack of bidder interest. PWD project.

🏠 NEARBY LANDMARKS

User Rating	~3.8 / 5.0	~4.1 / 5.0	~4.1 / 5.0	~4.2 / 5.0	~4.0 / 5.0
Primary Customer Type	Transit Traffic (High Volume)	Local Residents	EV / Service Center Users	Hospitality / Commercial	Dwarka Commuters

> OUR MOAT

High volume due to prime arterial location (Pankha Road) and legacy, flagship IOCL outlet with XP100 availability. Integrated multi-energy ecosystem (Petrol, Diesel, CNG) and non-fuel services (Diesel Delivery, Lubricants).

platform usage by customers.

POSITIVE

Very good service

Good service

XP100 availability

High volume fuel sales

CNG dispensing facility

Diesel delivery service

CONCERNS

Long queues, especially for CNG

Traffic congestion on Pankha Road

Access difficulties during peak hours

Forecourt congestion impacting other customers

NOTABLE REVIEWS

"Getting crowded and long queues. Specially for CNG users"
CNG queue and congestion

"Very good service"
Service quality

"normal petrol not available at 9:00 PM"
Product availability

DIGITAL PRESENCE

The station has a strong digital footprint primarily on Justdial, indicating high local search activity and transaction volume. Google Maps presence is noted but less substantial, suggesting a potential disparity in platform engagement. The digital presence reflects a high-volume, established outlet, though user sentiment highlights significant operational challenges related to congestion.

Anomalies & Leftover Intel

Deep Scan

DATA ANOMALIES

Search tags mention 'Level 2 AC Electric Vehicle Charging Stations' but no definitive confirmation of an active, high-speed DC charger.

Low

Potential misrepresentation or outdated information regarding EV charging infrastructure, missing out on a growing market segment.

"There is ambiguity regarding the station's Electric Vehicle (EV) infrastructure. While search tags associated with the station mention "Level 2 AC Electric Vehicle Charging Stations", there is no definitive confirmation of an active, high-speed DC charger on site"

Disparity in user ratings between Justdial and Google Maps, with Justdial having significantly more ratings.

High

Suggests a platform usage difference in the local demographic, where Justdial is a more dominant platform for local service discovery, potentially skewing the perceived popularity if not weighted correctly.

"Google Maps Lag: The station appears to have fewer reviews on Google Maps compared to Justdial, which is a data anomaly the dashboard should account for (weighting Justdial data higher for this specific asset)."

ENVIRONMENTAL COMPLIANCE

Category: Orange

Trigger: Automobile Washing Activity generates effluent.

Status: Consent to Operate renewed on May 3, 2019. Previous FSC issued on September 18, 2016.

- Fire Safety Certificate (FSC)
- Maintain functioning fire suppression systems
- Maintain unobstructed escape routes

- Maintain trained staff available round-the-clock

① MISCELLANEOUS INTELLIGENCE

🔍 REGULATORY

Ownership Legacy

Historically owned by Aslam Sher Khan, former hockey captain, Union Minister, and MP. Current operational structure is a proprietorship registered under GST since 2017.

🔍 REGULATORY

Political Ownership Context

Dealership likely allotted under discretionary quota to a public figure. Implies historical political connectivity and higher risk of public scrutiny.

🔍 HISTORICAL

Historical Security Incident

Vandalized by Shiv Sena activists in 2002-2003 over alleged customer cheating. Highlights intersection of fuel retail and political volatility.

🔍 REGULATORY

Legal Entity Structure

Proprietorship (indicated by 'P' in PAN), meaning a single individual bears full liability and control.

🔍 REGULATORY

GSTIN

07AAJPK1526E1Z1 (Delhi jurisdiction)

🔍 STAFFING

Operational Contact

Sh. Bhim Singh (Sales Manager, as per 2019 inspection report)

🔍 OPERATIONAL

High-Volume Product

CNG is the volume driver, serving a relentless stream of auto-rickshaws and taxis, but is also the primary source of forecourt congestion.

🔍 MARKET

Niche Product

XP100 (100 Octane Petrol) availability indicates a high-density of luxury vehicles in the catchment area, marking it as a 'Flagship' outlet.

🔍 OPERATIONAL

Value-Added Service

Fuel at Call service for door-to-door diesel delivery to stationary equipment.

🔍 OPERATIONAL

Fleet Program

Accepts Xtrapower Fleet Card for logistics companies and corporate fleets.

🔍 INFRASTRUCTURE

Traffic Congestion Impact

Chronic congestion on Pankha Road limits throughput; stalled Janakpuri Flyover project paradoxically preserves station's prime frontage.

🔍 MARKET

Primary Competitor (CNG)

Jay Garud Gas Station (Janakpuri B-Block), perceived to have better CNG pressure/management.

🔍 MARKET

Key Competitor (EV Focus)

Speedways Service Centre (Jail Road, Hari Nagar), which has aggressively pivoted to EV charging.

🔍 OPERATIONAL

Forecourt Cannibalization Risk

Long CNG queues can spill onto Pankha Road, blocking entry for petrol/diesel customers and deterring potential buyers.

OPERATIONAL

Service Improvement Trend

Recent reviews indicate positive service interactions, suggesting improved staff training.

FUTURE OUTLOOK

EV Transition (12-24 months)

The station's current unconfirmed EV charging infrastructure (potentially only Level 2 AC) puts it at a disadvantage against competitors with DC fast chargers. It is missing out on the rapidly growing EV taxi segment.

Urban Infrastructure Development (5-10 years)

The stalled Janakpuri Flyover project presents a long-term uncertainty. While its absence currently benefits visibility, future project revival could alter access and positioning.

Congestion Management (Ongoing)

Optimizing CNG throughput during peak hours (08:30-11:00 AM and 05:30-09:30 PM) is crucial for unlocking latent value and mitigating 'forecourt cannibalization'.

Market Positioning (6-12 months)

Aggressively marketing XP100 availability could attract high-value customers and better compete with premium outlets like C M Enterprises.
